(6000 LITRES)

### Benefits of using bale Coco peats

- Bale coco peats eliminates the rehydration or wetting process, which will save considerable cost and energy
- The contents and content ratio can be customized as per customer's request. Possible contents include coco peat, coco cut fibre, coco clear chips, coco crushed chips, perlite, fertilizers, and nutrients.
- Shrink wrap packaging, makes storage and handling convenient.
- Chemical and physical characteristics of the coco peat are well-looked-after.
- The 1: 2 compression ratio and the moisture level make it easy to unpack the coco peat using loader machine or any other simple mechanism.
- The physical structure of the coco peat is not likely to be damaged because of the compression ratio and the moisture level.
- Foreign particles present is significantly reduced because drying process is not needed.
- Bale packing facilitates continuous integration of the mixing line process and the bagging line process.
- Bale packing gives assurances of continuous supply of uncompromised quality throughout the year regardless of the prevailing weather conditions in the manufacturing location.
- The packing time and cost are reduced.
- 100% water proof packaging

100% Organic

Our products are 100% organic and absolutely no chemicals are used while production
